AMS BANK APP

Aug 2019 - Present (1.2 years)

Company: Direct FN

Asset Management System is a comprehensive, extensive and robust solution for Asset Management companies. It supports multiple yet diverse investment models like Mutual Funds and Private Portfolios simultaneously. If Portfolio module supports multi-exchange equities diversified fixed Income and money market instruments and Registry Module provides far reaching interfaces, then there is a fully integrated multicurrency Accounts module to cater for automated accounting entries.

Asset Management System also comes fully equipped with a uniquely designed Client Relationship Module (CRM), enabling the fund managers to maintain a close relationship with their customers and to provide real time feedback through modern communication channels.

OMS Bank App

Jun 2016 - Feb 2017 (8 months)

Company: Direct FN

DirectFN, a provider of comprehensive brokerage solutions for the Middle East and South Asia, has announced that it has received certification for its latest Order Management System (OMS) for FIX Order Routing and Feed Processing from the Qatar Exchange via its Nysa Euronext platform and also migrated clients to the Kuwait Stock Exchange's new Nasdaq OMX X-stream Platform.

Company: Direct FN

Scooter

Allows you to locate scooters and check their battery charge. If you don't have docks for your scooters, people will likely leave them literally anywhere. You'll need to locate them to bring them back for repair and charging. Provides access to all user profiles. The admin panel should let you block a user in case they violate your rules. Through this feature, you can also answer requests to your support team via phone or live chat. Shows you the history of all transactions. With this feature, you can also set a price for your service and establish a fine system for rule violations. Allows you to see data on each ride, e.g. its length, average speed, route, and more. With this feature, you can also edit information about rides. View all QR codes in your admin panel and manage them: for example, edit links according to your need. This feature will tell you exactly where a particular scooter is and where it's heading, this feature will show you. You can also control the scooter as it goes: for example, by setting a speed limit.

Mubasher DirectFN pro 10 plus (Trade Router)

A set of middleware applications providing integration platform for DirectFN client applications and third party OMS. As primary resource maintaining and providing through production support including implementation
