PROJECTS

Beehive Automation(FYP)

FYP was IOT based. Data from sensors was being uploaded on firebase and then MIT App fetch the data from firebase and was displaying temperature ,humidity and weight of honey values on the screen.

Quiz app using C++ and visual studio

A C++ console application in which user can add quizzes for other users. The app saves all answers and calculate user's score at the end of quiz.

Shooting Game in unreal engine

We had to design 3D models in 3Ds max first and then imported those models in unreal engine where we created different characters and animations.

Street Store Project 2019

It was a volunteering project in which we distributed clothes and different daily need items in the privileged area. I was the head of this project.
